PAWNEE INCIDENT CA-LNU-009002

INCIDENT ACTION PLAN

OPERATIONAL PERIOD

6/29/2018 0700

to

6/30/2018 0700

Dan Mahoney 1100hrs.

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">PAWNEE</p>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">Date From:</td> <td style="width: 33%;">6/29/2018</td> <td style="width: 33%;">Date To:</td> <td style="width: 33%;">6/30/2018</td> </tr> <tr> <td>Time From:</td> <td>0700</td> <td>Time To:</td> <td>0700</td> </tr> </table>	Date From:	6/29/2018	Date To:	6/30/2018	Time From:	0700	Time To:	0700												
Date From:	6/29/2018	Date To:	6/30/2018																		
Time From:	0700	Time To:	0700																		
3. Objective(s): <u>Strategic Objectives</u> <p>A full suppression strategy is to be implemented on the Pawnee Incident. Values at risk associated to the incident include human safety, private property and associated improvements, electrical power infrastructure, and cultural values. Minimize acres burned on all lands by utilizing effective and efficient tactics while maintaining safety first.</p> <u>Leaders Intent</u> <p>Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take the appropriate actions regarding:</p> <ul style="list-style-type: none"> - Professional behavior, conduct timely/effective communications - Personal safety and safety of others, including driving slowly, safely and defensively - implementation of tactics that offer a high probability of success - Manage fatigue by taking breaks and maintaining work/rest cycles <u>Management Objectives</u> <ul style="list-style-type: none"> - Fight fire aggressively while maintaining safe work practices to minimize threats to the public and emergency responders - Minimize damage to structures, private property and other improvements in the fire area - Protect natural, cultural, heritage resources - Continue to foster and maintain positive relationships with all local cooperators and stakeholders - Provide timely and accurate incident information - Maintain fiscal accountability keeping costs commensurate with values at risk <u>Control Objectives</u> <ul style="list-style-type: none"> - Keep the fire North of Highway 20 - Keep the fire East of High Valley Road - Keep the fire South of Bartlett Springs Road - Keep the fire West of Bear Valley Road 																					
General Situational Awareness: <p>Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.</p> <p><u>S</u>top, <u>T</u>hink, <u>O</u>rganize, <u>P</u>roceed</p>

INCIDENT Weather Forecast

FORECAST NO:	3	NAME OF FIRE:	Pawnee Fire
PREDICTION FOR:	Fri-Sat 0700-0700	UNIT:	Sonoma Lake Napa
SHIFT DATE:	June 29-30, 2018	Incident Meteorologist:	Dan Harty
FORECAST ISSUED:	1900 PDT, June 28, 2017		<i>Dan Harty</i>

WEATHER DISCUSSION: High pressure building in from the Pacific today through Saturday will bring hotter and drier conditions along with strong northerly wind gusts. A **Red Flag Warning** is in effect from 11 AM today through 5 AM Sunday for gusty winds and low relative humidity. Overnight relative humidity recovery will be poor. A cooling trend with higher humidity and lighter winds will develop early next week.

...Red Flag Warning for Gusty Winds & Low Relative Humidity...

WEATHER FORECAST for FRIDAY:

WEATHER: Sunny.

MAX TEMPERATURES: 90-95°

MIN HUMIDITY: 13-17%

20 FOOT WINDS:

SLOPE/VALLEY - Northerly 7-12 with gusts to around 20 mph.

RIDGETOP - Northerly 14-18 mph with gusts around 25 mph.

WEATHER FORECAST for FRIDAY NIGHT:

WEATHER: Clear.

MIN TEMPERATURES: 67-72°

MAX HUMIDITY: 25-35%

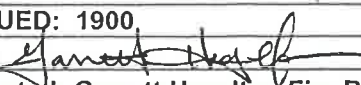

20-FOOT WINDS:

SLOPE/VALLEY - Northerly 10-15 with gusts to around 25 mph, strongest late night/morning.

RIDGETOP - Northerly 15-20 mph with gusts 30-35 mph, strongest late night/morning.

OUTLOOK for Saturday: ...Red Flag Warning... Sunny. Maximum temperatures 97-103. Minimum relative humidity 7-11 percent. Northerly winds 15-20 mph with gusts up to 35 mph. Poor RH recovery.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 005	TYPE OF FIRE: Wildfire
FIRE NAME: Pawnee	OPERATIONAL PERIOD: June 29, 2018 Friday
	TIME ISSUED: 1900
UNIT: CAL FIRE-Sonoma, Lake, Napa	SIGNED: 
	Typed/printed: Garrett Hazelton Fire Behavior Spec

INPUTS

WEATHER SUMMARY: ****RED FLAG WEATHER CONDITIONS****
Daytime: Sunny with temps near 90° - 95°. Relative humidity: 13% - 17%
 20 foot winds up slope/up valley 15 - 20 mph gusts: Ridgetop 14 - 18 mph with gust to 25 - 30 mph by late afternoon.

Night time: Winds will increase after sunset into the morning. Clear with temps 62° - 72° and relative humidity 25% - 30%
 North 20 foot winds 7-12 mph w/ gusts to 20 mph after midnight ridgetop winds near 30 mph gusts.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Change In Weather Pattern Will Test Fire Containment

Red Flag weather will bring a testing to previous days suppressions efforts. Unburned fuels will be in alignment with wind and topography. Recent live fuel moisture samplings have indicated that live fuels will burn like dead fuels. With the lower RH fine dead fuels will easily ignite and sustain fire development. Already burned 100hr and 1000hr fuels could produce broadcast embers that can be transported by the winds. Solar heating over the burned area is creating dust devils which aids in transporting burning material away from containment lines. The poor nighttime RH recovery will provide minimal relief from the elevated fire danger rating. Escape fires could develop rapidly under these weather conditions. Highest winds are forecasted to impact after sunset lasting into the morning.

SPECIFIC:

Within Div. A, C, E, F, H, J the increased suppression efforts have led to a sharp decline in fire activity. North facing slopes are primed to create nuisance smokes as new wind direction and intensity will test existing containment measures.

The impact for Div. L, M is their position at the leading edge of the high gusting winds effecting the area. Wind speeds will be increased with the strong topographical features testing the heavy fuels that burned. Continued line construction has increased the fuel bed separation, but areas will still not have full direct line.

Of interest for Div. V/U is that the area previously burned on the west side of Indian Reservoir has regrown to moderate fuel loading. Escape fires in this branch could grow quickly as this area acts as a wind mixing zone between Walker Ridge and Bear Valley.

The concern for Div. T/R/P is in Benmore Canyon which presents with a good opportunity for new ignitions with the heavy grass fuels serving as an excellent receptive fuel bed especially to the east of Cougar Rd. The timber on the north slopes would serve as a good ember cast source should single tree torching occur.

PEAK BURNING CONDITIONS

Brush: ROS 100-120 chains/hr. Flame Length 20' - 30' Spotting ¾ - 1 Mile

Grass: ROS 200-240 chains/hr. Flame Length 12' - 15' Spotting ¼ - ½ Mile

AIR OPERATIONS: Forecasted for high winds aloft. Mixing height in the afternoon 8000 feet AGL.

SAFETY

Winds will increase rapidly without warning. Take weather often to track trends. Escape fires will develop quickly. Terrain and fuels make escape to safety zones difficult. Plan your routes.

Friday 29th Sunset: 20:40 - Saturday 30th Sunrise: 05:48

CALFIRE INCIDENT MANAGEMENT TEAM 3

1. INCIDENT NAME:	2. DATE PREPARED:	3. TIME PREPARED:
Pawnee	06/28/2018	1700
4. PREPARED BY:	5. LEADER NAME:	6. OPERATIONAL PERIOD:

SAFETY MESSAGE

A **Red Flag Warning** is a forecast warning issued by the National Weather Service to inform area firefighting and land management agencies that conditions are ideal for wild land fire ignition and propagation.

- Trees are weakened due to fire activity. Look Up, Look Down, and Around.
- **RED FLAG WARNING!!** Watch for changing weather conditions.
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- Be cautious when working around dozers have communications with them.
- Accountability – Know where, and whom you are working for and be on time.
- Be aware of residents in and around the fire area.
- Do not get complacent, keep up your situational awareness.

SNAG (Hazard Tree) SAFETY:

Size up snag hazards in work area

Never become complacent

Always look up

Get weather reports

Scout out parking, work areas, and safety zones

Advice co-workers of known hazards

Face your hazards and take appropriate action

Examine work area for other hazards

Take extra caution around heavy equipment

You are responsible for your own safe

4. UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

INCIDENT RISK ANALYSIS ICS 215A

BRANCH	HAZARDOUS ACTIONS/ CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	FIRE AND DROUGHT WEAKENED TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines IRPG (p. 22). Many of the trees within the fire area and along roadways are stressed. Snags are present. Be aware that trees may fall even if not impacted by the fire.
ALL	HAZARDOUS STRUCTURE	<ul style="list-style-type: none"> Follow Structure Size Up IRPG (p.13). Be aware of propane tank and natural gas hazards.
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Watch your speeds and for blind corners. Be cautious when crossing bridges that may be weakened. Use extra caution with the extended drive times.
ALL	WEATHER	<ul style="list-style-type: none"> RED FLAG WARNING!! Watch for changing weather conditions. The local pattern is a daily afternoon wind shift. Stay prepared.
ALL	PERSONNEL SAFETY	<ul style="list-style-type: none"> All personnel are responsible for their personal safety. Be sure to wear all required PPE while on the fire line. Be cautious of snakes and yellowjackets within the fire area.
ALL	POWER LINES	<ul style="list-style-type: none"> Follow Power Line safety guidelines IRPG (p. 24). Treat all downed power lines as energized.
ALL	HYDRATION	<ul style="list-style-type: none"> Drink water before, during and after each shift. Be alert for signs of heat stress in yourself and others.
ALL	FATIGUE	<ul style="list-style-type: none"> Monitor incoming and outgoing resources for level of fatigue. Provide sufficient rest during the work cycle.
ALL	MOP UP	<ul style="list-style-type: none"> Do not get complacent during mop up. Watch your footing. Wear all appropriate PPE.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Check the communication plan for frequency assignments. Use human repeaters as needed.
ALL	BRIEFINGS	<ul style="list-style-type: none"> Make sure everyone gets a briefing on the plan for the day. Document this on your ICS 214.
ALL	LCES	<ul style="list-style-type: none"> Ensure that LCES is being utilized.
ALL	AIRCRAFT AWARENESS	<ul style="list-style-type: none"> Be aware of rotor wash when working near helicopters. Understand that hazard trees may react to helicopters overhead. Monitor assigned aircraft frequencies.
DIV. E/F	CIVILIAN PRESENCE	<ul style="list-style-type: none"> Watch for increase in traffic. Be aware of returning residents.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Review IRPG (p. 80). Provide working space around equipment. Avoid working below equipment where rollout is a potential.
DIV. T/U	MERCURY MINES	<ul style="list-style-type: none"> Be aware of abandoned mercury mines on the East side of Walker Ridge.
Incident Name: <div style="text-align: center; font-size: 1.2em; font-weight: bold;">Pawnee</div>		<div style="display: flex; justify-content: space-between;"> <div> Date Prepared: 6/28/2018 Prepared by: David Brockman SOFI(T) <i>[Signature]</i> </div> <div> Operational Period: 6/29/2018 – 6/30/2018 0700-0700 </div> </div>

In readiness is all

Abandoned Mercury Mines

Pawnee Incident-CA LNU 009002

- **There are abandoned mercury mines located in Branch VII, Division T in map sections 6, 7, 12, 13, 28 and 29.**
- **These areas are identified on the Operations Map with hashed-lined polygons keyed as a Life Safety Hazard.**
- **Access roads to the mines have been flagged off to restrict access to the sites.**
- **These areas are to be considered Life Safety Hazards for soil disturbance which may expose the underlying hazardous material.**
- **There are no Health or Inhalation Hazards if the identified areas are exposed to fire as the mines and material have been capped with soil.**
- **Restrict access around these areas for all personnel, vehicles and equipment.**
- **Avoid these areas for implementing control lines, staging areas or drop points.**

CAL FIRE INCIDENT
MANAGEMENT TEAM 3

TRAINING SPECIALIST MESSAGE

TRAINERS/EVALUATORS:

The narrative in the ICS 225 (Performance Evaluation) should reflect the tasks performed by the trainee on the incident. Be as descriptive as possible.

TRAINEES:

Beat the Rush!!

****Please see the TNSP prior to starting the demob process****

In order to receive documented credit for your training assignment - you must register with the TNSP prior to starting the demob process.

Bring the following to the "exit interview"

- Your properly initiated Position Task Book
- Completed and signed ICS 225 Performance Evaluation
- Completed and signed Evaluation Record

Forms are available at the Training Desk

Rob Scott TNSP 949-292-3207

Justin Voyson TNSP-T 661-547-8629

CAL FIRE INCIDENT MANAGEMENT TEAM 3

DEMOBILIZATION MESSAGE

**Pawnee Incident
CA-LNU-009002**

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

Update

409.5

MEDIA – The California State Penal Code, Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

Social Media

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

In readiness is all

PAWNEE INCIDENT FINANCE SECTION MESSAGE

COST SHARE REPORTING CONTIUES:

Line supervisors (DIVS, OPBD, STAM, etc.) Please check in with the Cost Share Team at the end of your shift. They are located in the white trailer on the west side of the OES unit.

SUPRESSION DAMAGES:

Please report all fire suppression damage to the Comp Claims Unit Leader. We will need location, lat/long, property owner, type of damage, etc. Examples of "fire suppression damage: Damaged fence, crush culverts, pipe damage, broken gates, etc.

SHIFT TICKETS / HIRED EQUIPMENT VENDORS:

Line supervisors are responsible for completing shift tickets for all hired equipment resources working for them. Please turn completed shift tickets into the CAL FIRE Time Unit at the end of your shift. We will not accept shift tickets from vendors.

FEDERAL TIME:

Federal agency timekeepers are on site and available to assist our federal government cooperators with personnel and equipment time.

LOCAL GOVERNMENT TIME KEEPING:

The CAL OES representative is on site to handle F-42 and any questions you may have. If you are a local government cooperator from the Lake County / Napa County / Sonoma County area, please check in with the CAL FIRE Time Unit.

Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief. The Motel Tech Spec will have information on this.

ALL FINANCE FUNCTIONS ARE LOCATED IN THE "LITTLE THEATER" BUILDING JUST WEST OF THE FEEDING AREA.

**ROGER RAINES, FSC1, IMT3
TERRY EASTWOOD, FSC1, IMT3**

The intent of this document is to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

In readiness is all

FIRE SUPPRESSION REPAIR PLAN: PAWNEE INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be returned to functional status in order to prevent further damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rocky areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.

Archaeological and Historic Properties: General Fire-line Guidance

**Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
